Anne Evans

Email: audrey20@example.com
Location: São Paulo, Brazil

Summary

Passionate and highly skilled programmer with over 7 years of experience in designing and implementing high-performance software solutions. Proficient in both backend and frontend technologies, with a strong emphasis on cloud computing, microservices, and real-time applications. Adept in collaborating with cross-functional teams to deliver complex projects on time and within budget. Committed to continuous learning and professional development.

Experience

Senior Software Engineer

Tech Innovations Inc. - São Paulo, Brazil
January 2020 - Present

- Led the development of a **Real-time Chat System** using **Django** and **TypeScript**, improving user engagement by 40% and resulting in a 25% increase in monthly active users.
- Spearheaded the transition to a **Microservices Architecture**, which enhanced system scalability and reduced deployment times by 30%.
- Implemented CI/CD pipelines using **Jenkins** and **AWS**, increasing deployment frequency by 50% while minimizing downtime.
- Collaborated with data scientists to create a **Machine Learning Pipeline** for predictive analytics, which improved decision-making processes and reduced errors by 15%.

Software Developer

NextGen Solutions - São Paulo, Brazil
June 2016 - December 2019

- Developed and maintained RESTful APIs for various applications, ensuring high performance and responsiveness, with a focus on security and data integrity.
- Contributed to the design and implementation of an **API Gateway**, enabling seamless integration between internal and external services.
- Improved system performance by optimizing database queries in **MongoDB**, reducing response times by over 20%.
- Participated in Agile ceremonies and contributed to sprint planning and retrospectives, fostering a culture of continuous improvement.

Skills

- **Java**: Expert
- **Django**: Expert
- **AWS**: Advanced
- **MongoDB**: Advanced
- **Jenkins**: Advanced
- **TypeScript**: Advanced

Projects

Real-time Chat System

- Developed a user-friendly chat application that supports real-time messaging and notifications, resulting in increased user satisfaction and retention.

Microservices Architecture

• Designed and implemented a microservices-based system that enhanced application scalability and maintainability, allowing for independent deployment of services.

Machine Learning Pipeline

• Collaborated on a project that integrated machine learning models into existing applications, enabling data-driven insights and automating repetitive tasks.

API Gateway

• Created a robust API gateway that streamlined communication between microservices and external clients, improving system reliability and security.

Certifications

• **Certified Kubernetes Administrator**
• **Google Cloud Professional**

Education

Bachelor of Science in Computer Science
University of São Paulo - São Paulo, Brazil
Graduated: 2015

Languages

• **Portuguese**: Native
• **English**: Fluent
