Summary

Passionate and innovative programmer with over 5 years of experience in developing high-quality software solutions. Skilled in building scalable applications using a variety of programming languages and frameworks. Adept at collaborating with cross-functional teams to deliver robust software products. Seeking to leverage my expertise in **Django** and **Microservices** architecture to contribute to exciting new projects.

Experience

Software Engineer

Tech Solutions Ltd, Nairobi, Kenya
June 2020 – Present
- Developed an **E-commerce Platform** that increased sales by 25% within the first quarter post-launch, using **Django** and **Microservices** architecture. - Led a team of 4 developers in creating a **Payment Processing System** that handles over 1,000 transactions daily with a 99.9% uptime. - Implemented **Kubernetes** for deployment and scaling of applications, reducing deployment time by 30%.

Junior Developer

Innovatech Co., Nairobi, Kenya
January 2018 – May 2020
- Contributed to the development of a **Real-time Chat System** using **TypeScript** and **Django**, enhancing user engagement by 40%. - Assisted in building a **Web**

Application for project management that improved team productivity by 15%. -
Gained practical experience in **Machine Learning**, developing models for data
analysis that improved decision-making processes.

Skills

- **Django:** Expert
- **Microservices:** Advanced
- **TypeScript:** Advanced
- **Machine Learning:** Intermediate
- **Kubernetes:** Intermediate
- **Rust:** Intermediate
- **C++:** Beginner

Projects

- **E-commerce Platform**
  Created a scalable online shopping platform with integrated payment
  processing and user authentication, leading to a significant increase in user
  acquisition.

- **Payment Processing System**
  Engineered a secure payment gateway that supports multiple currencies and
  payment methods, ensuring smooth transactions and compliance with
  financial regulations.

- **Microservices Architecture**
  Designed and implemented a microservices architecture for various
  applications, enhancing flexibility and allowing for independent scaling of
  components.

- **Real-time Chat System**
  Developed a chat application that supports real-time messaging, file sharing,
  and notifications, boosting user interaction and satisfaction.

- **Web Application**
  Built a project management web application that streamlines task

assignments and enhances team collaboration, which was adopted by multiple teams within the organization.

Education

Bachelor of Science in Computer Science

University of Nairobi, Kenya
Graduated: 2017
- Graduated with Honors
- Relevant coursework: Software Development, Data Structures, Artificial Intelligence

---

Certifications

- **Scrum Master Certification**
  Acquired in 2021, demonstrating expertise in Agile methodologies and project management practices.

Personal Interests

In addition to programming, I enjoy contributing to open-source projects, participating in hackathons, and staying updated with the latest technology trends. I am also an avid reader of science fiction novels and enjoy exploring the outdoors during my free time.
