Gloria Hardin

Email: riggsolivia@example.net
Location: Paris, France

Summary

Enthusiastic and results-driven programmer with over 5 years of experience in developing scalable web applications and data-driven solutions. Proven expertise in Python, Django, and Node.js, with a strong focus on delivering high-quality software in agile environments. Possess a solid background in DevOps practices, enabling seamless deployment and integration of applications. Passionate about leveraging data science to extract insights and drive business decisions.

Experience

Senior Software Engineer

Tech Innovators, Paris, France
June 2020 - Present

- Spearheaded the development of a **Content Management System** that improved user engagement by 30% through enhanced functionality and user experience.
- Designed and implemented a **Microservices Architecture** for an e-commerce platform, resulting in a 40% reduction in deployment time and improved system scalability.
- Collaborated with cross-functional teams to deliver a **Mobile App** using React Native, achieving over 10,000 downloads within the first month of launch.

- Mentored junior developers in Python and Django, fostering a culture of continuous learning and improvement.

Software Developer

Data Solutions Inc., Paris, France
March 2018 - May 2020

- Developed a robust **Web Application** for analytics, utilizing Python and Django, which enabled clients to visualize data and generate reports, leading to a 25% increase in client satisfaction scores.
- Implemented DevOps practices, including CI/CD pipelines, which decreased the release cycle from weeks to days.
- Enhanced application performance by optimizing Redis caching strategies, resulting in a 50% decrease in response times.

Skills

- **Python**: Advanced
- **Data Science**: Advanced
- **Node.js**: Advanced
- **Django**: Advanced
- **DevOps**: Expert
- **Redis**: Intermediate
- **FastAPI**: Intermediate

Projects

- **Content Management System**: Developed a feature-rich CMS using Django that supports multi-language content, boosting user engagement and retention metrics.
- **Microservices Architecture**: Architected and implemented a microservices-based solution for a financial service provider, enhancing system resilience and scalability.

- **Mobile App**: Created a cross-platform mobile application that connects users with local events, leading to a significant increase in user interaction and community engagement.
- **Web Application**: Built a data analytics web application that provides real-time insights, enabling businesses to make data-driven decisions effectively.

Education

Bachelor of Science in Computer Science

University of Paris, France
Graduated: June 2017

- Relevant Coursework: Software Engineering, Database Management, Artificial Intelligence, Web Development
- Capstone Project: Developed a machine learning model for predicting customer churn, achieving an accuracy of 85%.

Certifications

- **Certified Python Developer** - Python Institute, 2021
- **AWS Certified Solutions Architect** - Amazon Web Services, 2022
- **Data Science Professional Certificate** - Coursera, 2020

Interests

- Open source contributions
- Attending tech meetups and hackathons
- Exploring advancements in AI and machine learning
